

Experiment 05:

Laboratory Exercise:

Code:

```
1  import { BrowserRouter, Routes, Route, Navigate } from "react-router-dom";
2  import Navbar from "../components/Navbar";
3  import Footer from "../components/Footer";
4  import Hero from "../components/landing_page/Hero";
5  import About from "../components/about/About";
6  import Support from "../components/support/Support";
7  import "../App.css";
8
9  function App() {
10   return (
11     <BrowserRouter>
12       <div className="h-screen w-screen flex flex-col overflow-hidden
13         bg-white text-gray-900 font-sans antialiased">
14         <Navbar />
15         <main className="flex-1 min-h-0 overflow-hidden flex flex-col">
16           <Routes>
17             <Route path="/" element={<Hero />} />
18             <Route path="/about" element={<About />} />
19             <Route path="/support" element={<Support />} />
20             <Route path="*" element={<Navigate to="/" replace />} />
21           </Routes>
22         </main>
23         <Footer />
24       </div>
25     </BrowserRouter>
26   );
27 }
28 export default App;
```

Output:
